-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to determining the capability of a user from receiving certain data types or communicating via certain networks and devices, classified in class 710, subclass 15, comprising means or steps for enabling a digital data processing system or computer to detect or observe an operating characteristic or condition of the peripheral.
- II. Claims 26-41, drawn to determining the availability of a user in relation to resource allocation, scheduling and surrounding circumstances of the user, classified in class 705, subclass 9, staff scheduling or task assignment.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I has separate utility such that a determination is made as to capability of a user to receive certain data content type (i.e., graphic images, audio, video streams) or communicate via a certain device or network type (e.g., WAP phone vs. SMS phone).

Invention II has separate utility such that the availability of the user is not solely dependent on whether the user is capable of receiving the certain type of data or communicating via a certain network or device. In other words, the fact that a user may be able to receive a

certain type of data or communicate via a type of device or communication network serves as a minimum pre-requisite in determining the availability of a user, however, various surrounding circumstances dictate such availability and the resulting indicator. See MPEP § 806.05(d).

Because these invention are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification or due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley B. Bayat whose telephone number is 571-272-6704. The examiner can normally be reached on Tuesday-Friday 8am-6: 30pm.
